Tawfiq Aziz Khan Rafi

rafitawfiq6@gmail.com 01309660771 linkedin.com/in/tawfiq-aziz-khan-rafi tawfiq-aziz.github.io/Portfolio/

SUMMARY

Computer Science undergraduate with hands-on experience in full-stack web development, **RESTful** API design, and **database** optimization. Passionate about building secure, scalable applications.

EDUCATION

BSc in computer science and engineering

BRAC University • September, 2022 - Present

PROJECT

Trip Hive

github.com/Tawfiq-Aziz/Trip-Hive • January 2026 - February 2026

- **Engineered Trip Hive**, a full-stack hotel booking web application supporting seamless user workflows, secure role-based authentication, and real-time reservation tracking.
- **Ensured cross-browser compatibility and seamless UI rendering**, resulting in a **100%** error-free user checkout and reservation experience during stress tests.
- **Developed an analytics dashboard for hotel managers**, visualizing real-time metrics including revenue breakdown, occupancy rates, and profit margins to drive data-informed pricing strategies.
- **Architected Trip Hive**, integrating **Stripe API** for secure online payments and creating a central dashboard for tracking hotel profit metrics and occupancy analytics.

Bracu Social

github.com/Tawfiq-Aziz/bracu_social • August 2025 - September 2025

- **Engineered BRACU Social**, a campus-exclusive full-stack social network implementing domain-restricted GSuite authentication to secure access for **BRAC** university students.
- **Implemented 1-on-1 direct messaging** utilizing **HTTP Short Polling** mechanisms, optimizing payload size and handling concurrent daily message requests.
- **Built a custom Lost & Found module and interactive Polling module**, boosting campus community engagement and streamlining item recovery tracking.
- **Developed an integrated Calendar component** enabling users to manage academic deadlines and personal tasks with **99.9%** client-side state synchronization accuracy.

Spice and Surprise

github.com/Tawfiq-Aziz/Spice_and_Surprise • May 2025 - June 2025

- **Engineered Spice and Surprise**, a gamified street food discovery platform featuring crowd-sourced vendor mapping, time-sensitive quest challenges, and interactive coupon reward systems.
- **Developed a "Spin the Wheel" challenge engine** using dynamic randomized algorithms, increasing daily user retention and engagement.
- **Architected a coupon generation and redemption module**, implementing validation checks to process reward claims with **100%** accuracy and prevent duplicate redemptions.
- **Architected a centralized admin control panel** allowing administrators to create, schedule, and evaluate time-sensitive street food challenges and reward structures.

SKILLS

Programming Languages: **Python**, **PHP**, **C**, **Javascript**
Frameworks : **Laravel**, **Express JS**
Database Management: **MySQL**, **PostgreSQL**, **MariaDB, Mongo DB**
Version Control: **Git**, **Github**
